

ASHISH DHAKAL

LARAVEL DEVELOPER

Pokhara, Nepal | ashishdhakal433@gmail.com | ashish-dhakal.com.np | github.com/Ashish-Dhakal | +977 9863379537

SUMMARY

Full-stack Laravel Developer with 3+ years of hands-on experience building scalable web apps, including multi-tenant systems and education platforms. Proficient in Laravel, Livewire, Tailwind CSS, and RESTful APIs. Skilled in Filament, payment integration, real-time features, and cloud deployment (DigitalOcean, AWS, Cloudflare R2). Launched my own education platform padandas.com, demonstrating end-to-end product delivery. Strong in Git/Bitbucket, database design, and SEO best practices. Focused on clean code and user-centric solutions.

PROFESSIONAL EXPERIENCE

Lead Laravel Developer (Home Offer Today) Mar 2026 - Present

- Led a team of developers in designing, developing, and maintaining full-stack web applications using Laravel, ensuring high code quality and timely project delivery.
- Collaborated directly with clients and stakeholders to gather requirements, define project scope, provide technical solutions, and ensure business objectives were met.
- Designed scalable system architectures, database schemas, APIs, and application workflows while planning development roadmaps and allocating tasks across the team.

Mid Laravel Developer (Multi Dynamic) Mar 2025 - June 2026

- Working on both backend and frontend development to maintain and improve company websites.
- Handling DevOps tasks, including server setup, deployment, and maintenance on DigitalOcean.
- Supporting and managing websites for different company franchises, ensuring smooth functionality.
- Troubleshooting bugs and resolving technical issues across multiple projects.
- Collaborating with team members to plan and complete new features and updates.
- Improving user experience and system performance through regular code improvements.

Junior Laravel Developer (The Firefly Tech) May 2024 - Mar 2025

- Gained hands-on experience in developing RESTful APIs and building scalable web applications using Laravel.
- Learned to write clean, optimized, and maintainable code following Laravel best practices.
- Worked with Laravel Filament to build modern admin panels.
- Contributed to real-world projects, enhancing backend functionality and database structure.
- Strengthened understanding of Laravel's ecosystem, including Eloquent, migrations, and validation.

Intern (Skybase Innovation) Oct 2023 - May 2024

- Started learning Laravel fundamentals including routing, controllers, Blade templating, and Eloquent ORM.
- Worked on a demo project to apply Laravel concepts in a practical setting.
- Gained experience in setting up Laravel environments and building basic CRUD functionalities.
- Collaborated with team members and received guidance on Laravel best practices and clean coding standards.
- Built a strong foundation for backend development and prepared for real-world Laravel projects.

PROJECTS

Laravel Package (Mail Sandbox) Laravel mail sandbox is the laravel package for local environment mail testing.

Padandas (Online Education Platform) Padandas is an online education platform for student to find notes for all level.

Also develop a mobile app for the same platform.

Padandas Mock Test (Online Mock Test Platform)

Padandas Mock Test is a online mock test platform for student to give the online test for different education level.

DocBook

DocBook is a complete management system that can be used for mid-level hospital for keeping patient record, booking appointment, patient history and many more feature.
